

ADD-A-PHASE®

TYPE HD PHASE CONVERTER

Type HD is the ADD-A-PHASE static three phase (3Ø) converter designed for equipment that must operate under most every condition. Type HD is built with components that allow for greater reliability on these types of applications.

This unit has been successfully used on warning systems and on pipeline installations throughout North America.

Due to its heavy-duty components, Type HD can also be used on applications that require many starts per hour – 60 or more.

FEATURES & BENEFITS

- Blowers – pipe organ
- Door openers
- Fire sirens, community warning sirens
- Flood gates
- Valve actuator pipeline motors
